  - SQLAlchemy
- HTML/CSS
- AWS

ABOUT ME

My name is Bob Marconi, I am a Junior Full-Stack Developer, excited to get my foot in the door at a company I can learn from and grow within. I am a motivated, proactive, and hands-on developer, with experience working both solo and in group settings. I am eager to learn new things every day and keep myself sharp with the things that I already know. In my free time I love playing Open world video games, Red Dead Redemption 2 is the greatest game ever developed. Additionally, I am a huge sports nut, and I never miss a Phillies game!

WORK EXPERIENCE

Gateway Kia of Warrington   2023-2024
Sales Associate
- Learned new sales software in 2 weeks and eventually became proficient enough to assist new salespeople.
- Developed great communication skills and worked in a team setting.

PA Stoneworks   2022-2023
Stone Mason Apprentice
- Had to be able to change focus quickly and often to adapt to the fast paced and unique environment of each job site.
- After only 6 weeks I was able to Independently handle many projects ranging from simple electric work (wiring an outlet) to masonry work (excavating and building a retaining wall).

PROJECTS

Ollie   SOLO PROJECT
https://ollie-05bo.onrender.com/
- Used Python/Flask to create backend functionality to Create, Render, Update, and Delete: Users, Pets, Reviews, Bookings, as well as search capabilities
- Created an AWS bucket to handle the storage and retrieval Images.
- Implemented Google Maps RESTful API to allow suers to "Get Directions" as well as filter results by distance from current location.

BrewReview (Yelp! Clone)   TEAM PROJECT
https://brewreview.onrender.com/
- Used Python/Flask to create backend routes returning Coffee Shops, Reviews, and Images.
- Used React to create a UI that allowed users to create render update and delete from a PostgresSQL database.
- Served as team lead and was tasked with a majority of the driving as well as assigning tasks to team members.

CERTIFICATIONS

Responsive Web Design - *freeCodeCamp*
- Learned the basics for HTML/CSS to create static webpages.
- Was able to use this to apply to further languages such as JavaScript or Python

JavaScript Algorithims & Data Structures - *freeCodeCamp*
- Learned how to use Javascript and RESTful API's to retreive data and use JavaScript to manipulate this data, then return it to the user.
