  - PostgresSQL
  - SQLAlchemy
- HTML/CSS
- AWS

BOB MARCONI
FULL STACK SOFTWARE ENGINEER

ABOUT ME

My name is Bob Marconi, a Junior Full-Stack Developer, and I am excited to get my foot in the door at a company I can learn from and grow within. I am a motivated, proactive, and hands-on developer, with experience working both solo and in group settings. I am eager to learn new things every day and keep myself sharp with what I already know. In my free time, I love playing Open World video games, Red Dead Redemption 2 is the greatest game ever developed. Additionally, I am a huge sports nut, and I never miss a Phillies game!

WORK EXPERIENCE

- **Gateway Kia of Warrington**   2023-2024
  Sales Associate
  - Learned new sales software in 2 weeks and eventually became proficient enough to assist new salespeople.
  - Developed great communication skills and worked in a team setting.

- **PA Stoneworks**   2022-2023
  Stone Mason Apprentice
  - Had to be able to change focus quickly and often to adapt to the fast paced and unique environment of each job site.
  - After only 6 weeks I was able to Independently handle many projects ranging from simple electric work (wiring an outlet) to masonry work (excavating and building a retaining wall).

PROJECTS

- **Ollie**   SOLO PROJECT
  https://ollie-05bo.onrender.com/
  - I used Python/Flask to create backend functionality to create, render, update, and delete users, pets, reviews, and bookings, as well as search capabilities.
  - I created an AWS bucket to handle the storage and retrieval of images.
  - Implemented the Google Maps RESTful API to allow users to "Get Directions" as well as filter results by distance from their current location.

- **BrewReview (Yelp! Clone)**   TEAM PROJECT
  https://brewreview.onrender.com/
  - Used Python/Flask to create backend routes returning coffee shops, reviews, and images.
  - We used React to create a UI that allowed users to create, update, and delete renders from a PostgresSQL database.
  - I served as team leader and was tasked with a majority of the driving as well as assigning tasks to team members.

CERTIFICATIONS

Responsive Web Design - *freeCodeCamp*
- Learned the basics for HTML/CSS to create static webpages.
- Was able to use this to apply to further languages such as JavaScript or Python

JavaScript Algorithims & Data Structures - *freeCodeCamp*
- Learned how to use Javascript and RESTful API's to retreive data and use JavaScript to manipulate this data, then return it to the user.
